

Beautiful is better than ugly.
Explicit is better than implicit. **Simple**
is better than complex. **Complex** is better
than complicated. **Flat** is better than
nested. **Sparse** is better than dense.
Readability counts. Special cases aren't
special enough to
break the rules.

Although **practicality** beats purity. Errors should never
pass silently. Unless **explicitly** silenced. In the face of
ambiguity, **refuse** the temptation to guess. There should be **one**
— and preferably only one — obvious way to do it. Although that
way may not be obvious at first unless you're Dutch. **Now** is
better than never. Although never is **often** better than right
now. If the implementation is hard to explain, it's a **bad**

idea. If the implementation
is easy to explain, it
may be a **good** idea.
Namespaces are
one honking great
idea — let's do
more of those!
